

## Wastewater Utility Green Power Report

June 2011

Electricity Generated in June: **54,463 kWh (kilowatt hours)**

This is equal to the electricity used by 59 homes in a month.

This amount of electricity would have cost \$3,812 if it had been purchased from Duke Energy.

**30,000 gallons of grease** were processed in our digesters for the month.

**18% of our plant's power has been generated  
on-site in 2011.**

The City of West Lafayette's Wastewater Utility has pledged to generate at least 10% of its electricity on-site in 2011 as Indiana's first wastewater plant to become an EPA Green Power Partner.
